

BYOPLANET® ELECTROSTATIC SPRAY SYSTEMS

Preventing illnesses has never been more important as we return back to school, work, and activities. The threat of illness is high in indoor spaces like offices, gyms, and schools due to shared spaces and surfaces that harbor a broad spectrum of microorganisms. Manual cleaning methods and traditional disinfecting tools aren't designed to effectively reach all surfaces, leaving facilities and their occupants at risk.

Efficient, Intuitive, and Effective Chemical Delivery

The ByoPack™ is a revolutionary electrostatic sprayer that is designed to sanitize and disinfect all surfaces, even hard-to-reach areas utilizing wrap-around coverage. The ByoPack™ superior surface coverage helps reduce illness, while also saving time and money.

- **Reduces Pathogens in Hard-to-Reach Areas Saving Universities = \$400,000 to Combat a Single Norovirus Outbreak**

Takes less time
UP TO 75% FASTER¹

Covers more space
18,000 FT² per hour²

Reduces Cost
USE 65% less solution¹

Chemistry Pairing

Clean Republic Disinfectant and Sanitizer. Comprised of salt, water, and electricity, Clean Republic is an eco-friendly solution for everyday disinfection.

- **Antimicrobial and Bactericidal**
- **Registered on EPA's List N for Use Against SARS-CoV-2**
- **Gentle Enough to Use Around Kids & Pets**
- **Byproducts are salt + water = minimal residue**
- **No Harsh Chemicals or Fumes**
- **Non-Corrosive & Non-Bleaching**
- **For Residential and Commercial Use**
- **Organic Materials Review Institute (OMRI) Listed**

1. Compared to a trigger sprayer
2. When spraying objects with complex geometries, work rate is reduced.
